

PINHOLE

Sunday, November 17, 2019
12-2pm

With a pinhole camera we go in the opposite direction of the constantly evolving digital cameras, pushing you to engage your imagination even more through the photographic process. You will see how easy it is to build your own 35mm film camera using everyday objects, and through this process get a deeper understanding of how a camera works.

No previous experience is required.
All materials provided.

Suggested donation: \$10
Max.6 participants

POINTE-SAINT-CHARLES ART SCHOOL

FALL 2019

All workshops led by **COLLEEN LEONARD**. A Montreal-based photographic artist and educator, currently completing an MA in Art Education at Concordia University. Colleen is focused on cultivating accessible, sustainable, and hands-on photo-based learning within communities and schools.

WORKSHOPS

POINTE-SAINT-CHARLES ART SCHOOL

Sunday, October 13, 2019
12-2pm

Learn one of the earliest photographic processes and create Prussian blue cyanotypes in this hands-on workshop. Cyanotype is a simple and non-toxic printing process that can be used on paper or fabric. This hands-on workshop covers exposing, and developing techniques.

No previous experience is required.
All materials will be provided.

Suggested donation: \$10
Max. 6 participants

CYANOTYPE

POINTE-SAINT-CHARLES ART SCHOOL

FALL 2019

LUMEN

Sunday, October 20, 2019
12-2pm

Lumen printing is a cameraless, experimental image-making technique that explores light, sun, time and traditional photo paper. This alchemical and creative process opens up a unique colour palette, as well as the potential for continuous experimentation and exploration. Participants will learn how to expose and develop their own lumen prints..

No previous experience is required.
All materials will be provided.

Suggested donation: \$10
Max.6 participants

PHOTOGRAM

Sunday, November 3, 2019
12-2pm

This workshop is perfect for anyone with an interest in the darkroom, photography and art in general! No experience necessary!

A photogram is a cameraless photographic process, using light sensitive paper, a light source and developing chemicals. It's an instant process making it perfect for gaining an understanding of how important light is to photography.

No previous experience is required.
All materials will be provided.

Suggested donation: \$10.00
Max.6 participants
